

## Android Application Development HW5

108820018 電資三 蔡翔宇

### 04.2

1. The major difference is that checkboxes enable multiple selections, while a RadioGroup allows only one selection.
2. LinearLayout
3. `onRadioButtonClicked()`

### 04.3

1. `menu_main.xml`
2. `onOptionsItemSelected()` (MenuItem item)
3. `myAlertBuilder.setTitle("Alert");`
4. In the `onCreateDialog()` method in the extension of `DialogFragment`
